We moved to our 4 bedroom apartment in Gurgaon from a small flat in Delhi. It was a nice apartment in one of the best condominiums in Gurgaon. But no interiors had been done. It had the essentials provided by the builder but that's it.

I always had a dream of having a good looking house and now wanted to realize that dream. I am personally not a creative person and therefore needed some external help. I tried to contact a few interior designers and discussed my requirements with them. I wanted a tastefully done up house which was at the same time practical and easy to maintain. Most of the designers showed me designs that seemed very gaudy and not in line with my taste. Budget was another constraint to be kept in mind.

Then I met Neha Srivastava. She is a young girl and as soon as I met her, I got a sense of her warm personality and her professionalism. I explained my requirements to her and she quickly came up with 2 designs and I really liked one of them. She has impeccable taste, an excellent eye for color, and very creative ideas to make any home beautiful and outstanding. This is exactly what Neha has done for our home and provided excellent service all the way through. One of the living room walls on which she has played with glass, high gloss wooden panels and natural polished wooden panels is a real beauty and is the highlight of the whole décor.

Today, I feel so proud when friends and relatives say "wow" when they first enter my house. Thank you Neha for making my dream come true.

I highly recommend Neha Srivastava to anybody looking at renovating a house or any other space. You will not regret your decision.
